

Missing or Unfulfilled Aspects:

1. Projects

- No live links to projects using `<a>`.
- Missing embedded media (e.g., video demonstration using `<iframe>`).

2. Certifications or Achievements

- Does not use a `<dl>` (definition list) to list certifications and achievements.

3. Hobbies

- Missing hover effect on icons/images to reveal more information.

4. Footer

- Keyboard navigation options (e.g., ARIA roles) are not explicitly included.

5. Interactive Elements

- Contact form is included but lacks hover animations for the submit button.
- No embedded media like `<audio>` or `<video>`.

6. Responsive Design

- The mobile layout could be further improved with flexible content adjustments beyond the basic `<meta>` tag.

7. Accessibility

- ARIA roles are not explicitly implemented to enhance screen reader compatibility.
